## 5.4.17 RELEASE INFORMATION

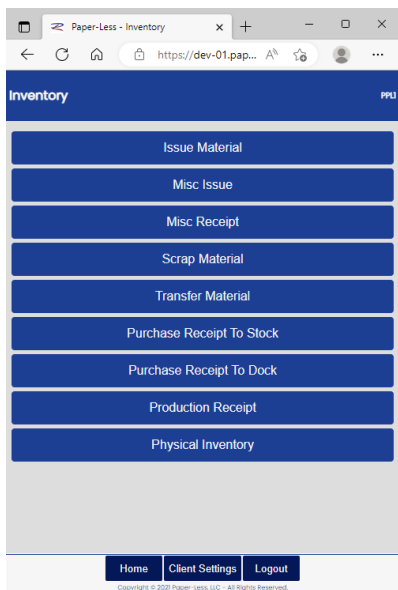

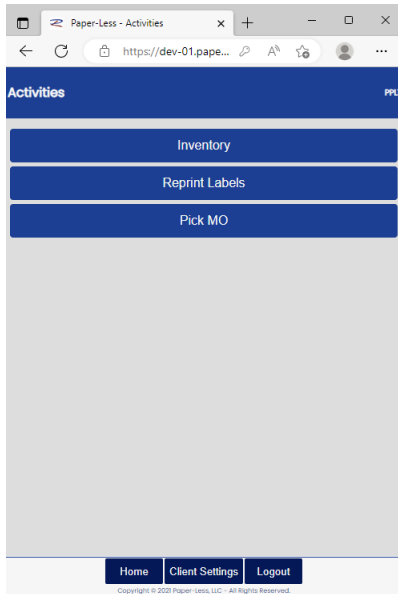

Paper-Less MES/MV2 .....	2
5.4.17 Release Information .....	2
Purpose .....	3
New Features & Enhancements .....	3
Defects/Repairs/Bug Fixes .....	5

# PURPOSE

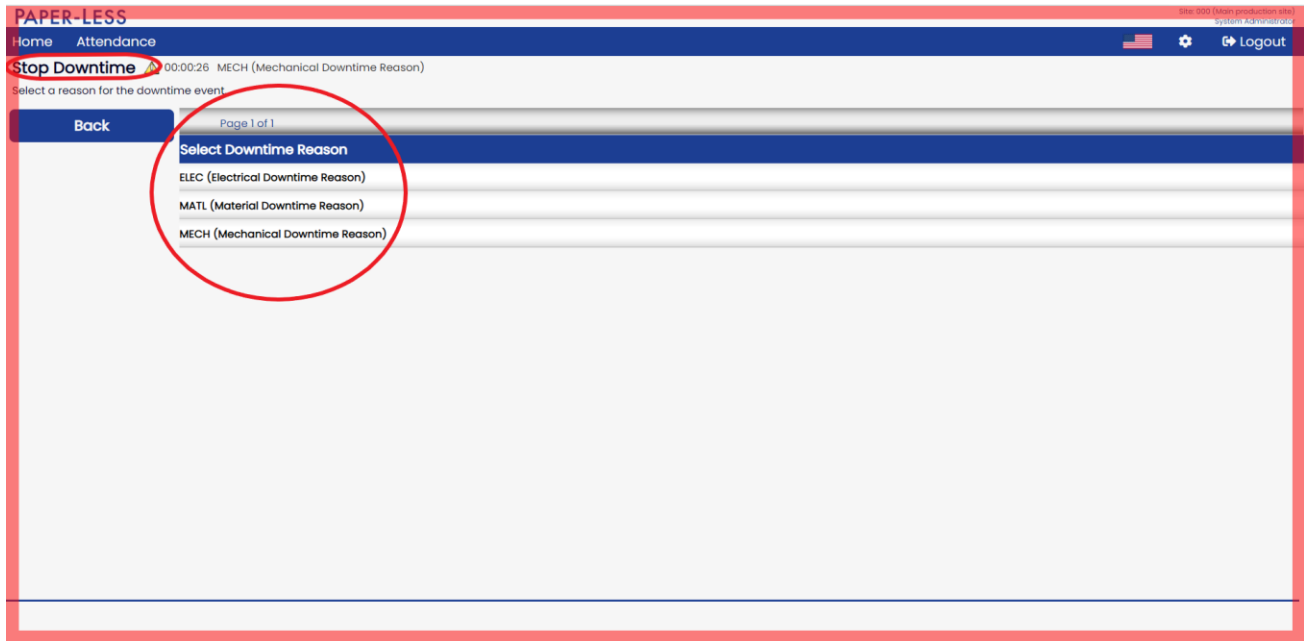

The purpose of this document is to outline the major enhancements and change requests made to the latest Paper-Less release. Prior to performing any upgrades, please review the Paper-Less Hardware and Software Requirements documentation to ensure your system meets the latest recommended requirements. If you have any questions, please contact the Paper-Less Help Desk at: [technical.support@paperlessllc.com](mailto:technical.support@paperlessllc.com) or 888-473-0800.

# NEW FEATURES & ENHANCEMENTS

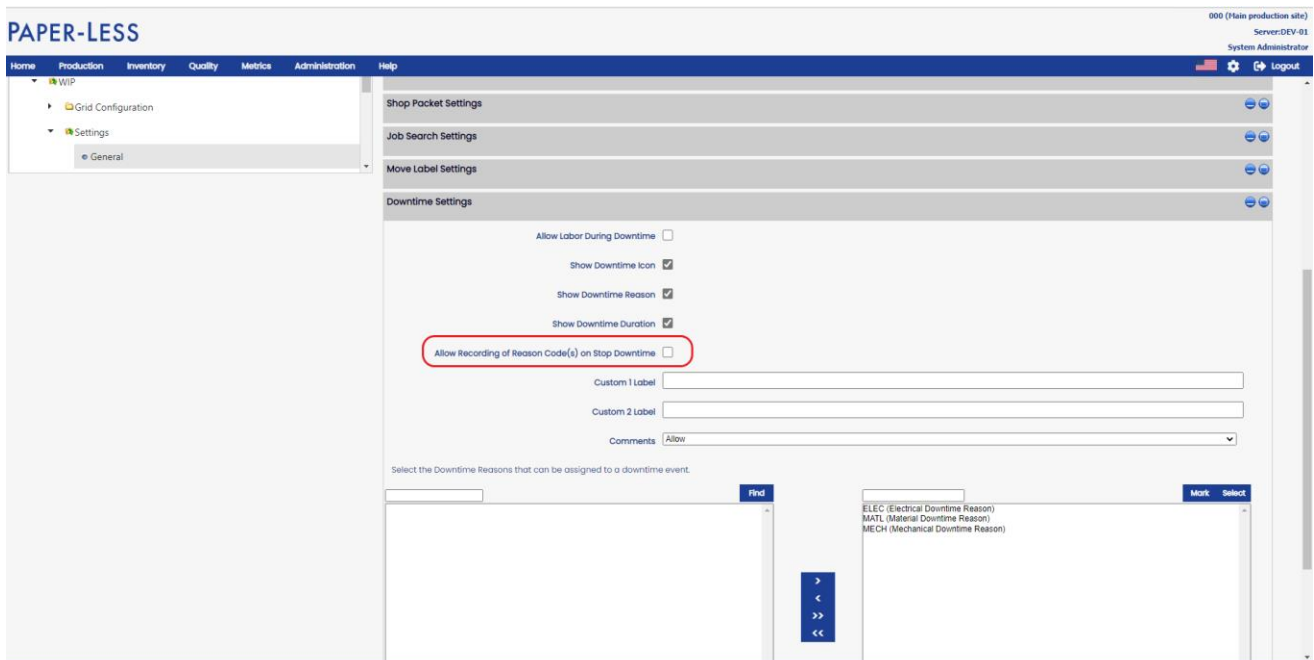

- Restyled the mobile apps to provide a consistent look with the Touchscreen and Portal apps. The new look improves the readability and interaction points with the application to be touch-friendly when interacting with the application on a small form factor.

- Improved the performance in Mobile search for Manufacture Order in Issue Material.
- Enhanced the Downtime function with the ability to change or select the Downtime Reason Code when performing a Stop Downtime.

- Added a config option for selecting a Downtime Reason Code when performing Stop Downtime.

- In the Mobile app, added the ability to print labels for Purchase Receipt to Dock the same way they are printed for Purchase Receipt to Stock and Inspection.

## **DEFECTS/REPAIRS/BUG FIXES**

- Fixed a problem where the operator panel setting is reverted upon closing the browser.
- Fixed an issue where the WIP Grid was not displaying when an error was displayed, or when clicking Cancel on a WIP Action Button prompt for username.
- Fixed an issue in Mobile Physical Inventory transaction, where clicking Search on the Item field would give an error of Inventory Balance not found.
- Fixed an issue where performing a manual Production Receipt, rather than the Production Receipt through the WIP workflow, the user was unable to select a serial number that may have been created during a previous Record Pieces transaction.
- Fixed an issue in the new WIP grid where the cursor was not being placed in the first input field when a module, such as Record Pieces module, is loaded.
- Fixed an issue where running a bulkload was causing a constraint violation error when it shouldn't.
